

15-25GHz, 3-Way Power Divider/Combiner

GaAs Monolithic Microwave IC in SMD leadless package

Description

The CHW4213-QAG is a 3-way 0° Power divider/Combiner designed for wideband operation from 15 to 25GHz. It supports many applications including phase array radars, 5G applications as well as satellites communications and Test & Measurements. The circuit is manufactured on GaAs passive technology dedicated for high performance. It is supplied in RoHS compliant 3x3mm SMD package.

Main Features

- Broadband performances: 15-25GHz
- Insertion Loss (above 4.8 dB): 0.5dB
- Isolation in the range of 20dB
- Good amplitude unbalance: < 0.5dB
- Very good phase unbalance: +/- 2°
- 16L QFN3x3
- MSL1

The SUM PORT has been noted S in the previous pages of this document.

Path S->1 is entering the part on the SUM port and exiting thru the PORT1 (North access of the package)

Path S->2 is entering the part on the SUM port and exiting thru the PORT2 (East access of the package)

Path S->3 is entering the part on the SUM port and exiting thru the PORT3 (South access of the package)

(1) The package outline drawing included to this data-sheet is given for indication. Refer to the application note AN0017 (<https://www.ums-rf.com>) for exact package dimensions.

(2) It is strongly recommended to ground all pins marked “GND” through the PCB board. Ensure that the PCB board is designed to provide the best possible ground to the package.

Evaluation board for measurements accuracy

Losses due to board are partly de-embedded: the reference planes used for S_{ij} measurements presented previously in this document are located at 0.8mm offset from the package edges. Reference planes are showed in red on the drawing.

Note: The given S_{ij} parameters incorporate the land pattern of the evaluation motherboard.

Package Information

Parameter	Value
Package body material	RoHS-compliant
	Low stress Injection Molded Plastic
Lead finish	100% matte tin (Sn)
MSL Rating	MSL1

Evaluation board for temperature characterization

- Compatible with the proposed footprint.
- Based on typically Ro4003 / 8mils or equivalent.
- Using a micro-strip to coplanar transition to access the package.
- Recommended for the implementation of this product on a module board.
- See application note AN0017 for details.

Note: All board measurements are performed using shielded cables to ensure safe operation.

CHW4213-QAG 15-25GHz, 3-Way Power Divider/Combiner

Recommended package footprint

Refer to the application note AN0017 available at <https://www.ums-rf.com> for package footprint recommendations.

SMD mounting procedure

For the mounting process standard techniques involving solder paste and a suitable reflow process can be used. For further details, see application note AN0017 at <https://www.ums-rf.com>.

Recommended environmental management

UMS products are compliant with the regulation in particular with the directives RoHS N°2011/65 and REACH N°1907/2006. More environmental data are available in the application note AN0019 also available at <https://www.ums-rf.com>.

Recommended ESD management

Refer to the application note AN0020 available at <https://www.ums-rf.com> for ESD sensitivity and handling recommendations for the UMS package products.
